3 STEP ULTRABOND PAD

Destinado al Pulido y Abrillantado de las superficies duras.

ref. 061601

Recommended
200-2.000 r.p.m.

TECHNOLOGIES ▼

TECHNOLOGIES: ▼

A controlled and homogeneous dispersion of the diamond makes this technology the perfect combination to achieve superior **Diamond Resin Abrasives.**

It allows the **exact dispersion and positioning** of the **diamond grits** on the outside of a network type support with an open structure.

Revolutionary polishing system in just three steps. Reduce unnecessary steps to get the level of polish and shine desired, saving costs of tool and work time.

Individual identification by marking and color code, informing of the corresponding grit/step.

Ecological. This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006

ISO 9001:2015 CERTIFIED

ULTRABOND ECO-SYSTEM

ADVANTAGES: ▾

EASY 1/2/3

_Three easy steps with individual identification to achieve **the desired shine intensity and cleaning**.

ONLY WITH WATER

_Only needs water, **not necessary using chemical products**. Avoid chemical odors and stains.

MAXIMUM SAVINGS

_This simple system reduces the number of passes to achieve the desired shine and cleanliness **reducing time and costs**, as well as the 100% spending on chemicals..

MIRROR SHINE

_Thanks to **ULTRABOND** technology, the desired level of shine on floors, stairs, stone countertops, tables and shelves is achieved, including a SHINE MIRROR.

ALL MACHINES

_It is not necessary to invest in new machinery to start using this novel Floor Polishing and maintenance system.

ANTI-SLIP

_Non-slip floors, safe to traffic and free of accidents, both wet and dry.

SAFE FLOOR
