- \_CLEAN

#### INOX

The stainless steel brushes (INOX) are used to eliminate the sand of the fissures before treating the surface with mastics. They are always supplied resin coated.

#### MIXTO (INOX+36)

These brushes combine filaments grit 36 with stainless steel filaments. Its use quickens the ageing process and accentuate the resulting texture.

#### INOX GOLD

The GOLD braided steel brushes are used to quickly and energetically texture hard materials such as granite. It also removes dirt from the cracks in materials. They are always supplied resin-coated.

#### CLEAN

The cleaning brushes do not contain abrasive and are destined to clean materials or to apply chemical products.

TECHNOLOGIES: ▼

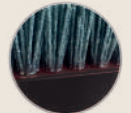

## DRILL TUFT<sup>3D</sup>

Technology that combines the 3D CAD design with the construction of the support and the insertion of the filaments in the same order of production, achieving the manufacture of technical brushes with maximum precision and efficiency.

## RESIN<sup>®</sup> FORMULA

All brushes can be **resin coated**. This allows to apply greater pressure on the tools in the process, achieving a **greater texture**.  
Recommended option when treating very hard stones.

**Individual identification** by marking with a numerical button, informing of the corresponding grain.

**Ecological.** This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006

ISO 9001:2015 CERTIFIED
