EDGE POLISHER

CNC

AVAILABLE OPTIONS: ▼

GRITS ▶ 50-100-200-400-800-1500-3000
White Shine- Black Shine

	COUPLING	TYPE
100mm	M14 DX SX TZ VEL	Straight edge
125mm	M14 DX SX TZ VEL	Toroidal edge
		Straight edge
		Bevel
150mm	M14 DX SX TZ VEL AN COPA	Straight edge

OPTIONS ▶ NORMAL **FORCE SYSTEM®**

UNITS ▶ ref. 050202

ADR WHEELS

Diamond Resined Abrasive (ADR) destined to polish and gloss edges.

TECHNOLOGIES: ▼

_A controlled and homogeneous dispersion of the diamond, makes this technology the perfect combination to achieve superior **Diamond Resin Abrasives**.

_ **Specific formulations** developed to optimize the polishing of different materials.

_ **Undefined storage keeping** stable without changing its properties over time.

_ **Increase in the productivity** with respect to the traditional abrasive, avoiding the continuous machine stops.

PERFORMANCE
ADR abrasive
Traditional abrasive

_The construction of the tool combining flexible with rigid parts guarantees a perfect coupling and a constant contact on surfaces, **avoiding marks and scratches on the polish**.

_We recommend applying **Force System technology on the finest grits** to achieve the highest polishing and shining quality.

_Example of maximum industrial automation by means of a multi-press system executed by robotic arms. Hereby we ensure the **maximum precision in processes and products**, with **constant quality** that differentiates us.

_The **geometric structure** of the honeycomb is the ideal base to build products with a very **resistant structure** while being light, providing a perfect **cooling** during use.

_Revolutionary diamond formula with **absence of pigmented fillers**. Eliminates the danger of transferring color to surfaces, achieving a **perfect polish on any surface**.

_ **Individual identification** by marking with a numerical button, informing of the corresponding grain.

_This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006
