TECNOLOGIES:

The combination of minerals with **magnesium oxide**, bound by **synthetic resins**, results in very **economical** and **high-performance** abrasive products.

Recommended option for Fickert 140 mm with **coarse grains** where **high cutting or polishing power** is required.

Product **very stable**, not changing its properties over time.

The most delicate surfaces that require the best finish, require very **products soft abrasive**.

The **RESIN** formulations combine an elaborate selection of minerals, 100% agglutinated with specific **synthetic resins**, which together with a controlled production process, **guarantee** the **best finish** with **maximum performance**.

Ecological. This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006

ISO 9001:2015 CERTIFICATED
