TECNOLOGIES: ▼

Based on the **Fibonacci numerical series**, **semi-flexible** products have been developed, effectively texturing the surfaces.

Flexible filaments with **high resistance to wearing**.

Due to the **wide granulometric range**, it is possible to achieve different textures.

Undefined storage due to its **special anti-aging treatment**.

A controlled and homogeneous dispersion of the diamond, make this technology the perfect combination to achieve superior **Diamond Resin Abrasives**.

Example of maximum industrial automation by means of a multi-press system executed by robotic arms. Hereby we ensure the **maximum precision in processes and products**, with **constant quality** that differentiates us.

Individual identification by marking with a numerical button, informing of the corresponding grain.

Ecological. This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006
