## TECHNOLOGIES: ▼

**FIBER FLEX**

\_The combination of synthetic fibers with high flexibility resins enables the creation of innovative abrasives. **Tenacity and lightness** are the main characteristics of this new technology.

**FORCE SYSTEM**®

\_The construction of the tool combines flexible and rigid parts, guaranteeing a perfect coupling and a constant contact on the surfaces.

**\_Individual identification** by marking with a numerical button, informing of the corresponding grain.

**\_Ecological.** This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006
