TECHNOLOGIES: ▼

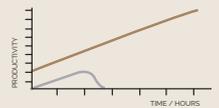

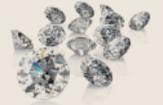

A controlled and homogeneous dispersion of the diamond makes this technology the perfect combination to achieve superior **Diamond Resin Abrasives**.

Specific formulations developed to optimize the polishing of different materials.

Undefined storage keeping stable without changing its properties over time.

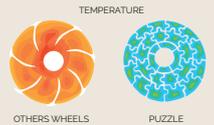

Increase in the productivity with respect to the traditional abrasive, avoiding the continuous machine stops.

PERFORMANCE
 ■ ADR abrasive
 ■ Traditional abrasive

Very effective Innovative cooling system, based on liquid cooling **"watercooling"**. It keeps the **tool refrigerated** and in optimal working conditions throughout its useful life.

Revolutionary diamond formula with **absence of pigmented fillers**. Eliminates the danger of transferring color to surfaces, achieving a **perfect polish on any surface**.

Example of maximum industrial automation by means of a multi-press system executed by robotic arms. Hereby we ensure the **maximum precision in processes and products**, with **constant quality** that differentiates us.

Exclusive format with design and specific parameters, used in hybrid tools for **polishing both straight and curved surfaces**.

Individual identification by marking with a numerical button, informing of the corresponding grain.

Ecological. This product does not contain substances prohibited according to the regulation (CE) n°1907 / 2006

ADR PADS

Our DIAMOND PADS with our proper design, engineering and manufacture, result in products with the highest performance and quality on all surfaces.
